Get Your Copy of *Green Housing* - the *Best* Practical Guide to Green Real Estate Management! *Every property management professional should have a copy!*

This user-friendly publication is an informative yet easy-to-read primer on green real estate management, and covers all of the basic concepts, such as energy efficiency, indoor environmental quality, resource efficiency, site sustainability, water efficiency, integrated pest management, tenant green education, and creating a green operation and maintenance plan.

If you are a building owner, developer, or property management professional who wants to go green but has limited capital, *Green Housing* will show you what you can do—no matter how small your budget—to reduce costs, reduce waste, and efficiently use energy, water, and other available resources. The book reveals how the use of sustainable and renewable products and practices can increase your cash flow, profitability, and asset value. It also explains how a whole-building approach will protect the health of your occupants as well as increase employee productivity.

\$35 per copy plus \$5 shipping and handling.
